

Preserve your property value for the long term

Construction consulting, coordination, and financing services under one roof

Planning: **Heating** Energy optimisation for your property

Your needs

- The energy costs for your building are high.
- You can increase the efficiency of your heating system.
- You no longer want to use fossil fuels.
- Economic and environmental survey of your heating system
- Long-term cost savings thanks to lower operating and maintenance expenses
- Increase in real estate value and appeal of your property
- Reduction in carbon emissions, contribution to protecting the environment by using a renewable energy source

Receive an analytical report with

1. Building data, energy performance, dates
2. Property's compatibility with heating equipment/system
3. System size and output for the building energy system (heat, hot water)
4. Costs and income

Types of heating systems

Cost efficiency and amortisation

Energy efficiency and output

The benefits are clear.
